IP Telephony Products

Quadro IP PBXs, Gateways & Conference Server

epygi

Manufactured in the USA

IP PBXs

These provide you with all the facilities you normally associate with traditional telephone systems plus many extra, business-enhancing features. These features, such as linking your organization's website to its phone system, can make your office more efficient while appearing larger and more professional. There's no need to change your telephone numbers.

Staff and callers will not realize that they are using an IP system as the Quadro manages your flow of data and voice for best sound quality. As these PBXs are compatible with all analog, IP and mobile phones, you can choose the option that best suits your office. Your organization's faxes and telephone-based credit card authorization systems can all be handled smoothly by the Quadros.

Quadro is your RIGHT choice

Competitively priced, these IP PBXs save your business money immediately by automatically choosing the most cost-efficient routing for each call, particularly valuable for long-distance and overseas calls. This means that you quickly recoup your initial investment. Also, your Quadro gives you detailed information on all calls, which enables you to bill accurately and helps you eliminate unauthorized use.

For your security, they have integral firewalls to stop viruses entering your system, and you can set up virtual private networks (VPNs) to give you privacy when making calls.

Quadros also have built-in traditional landlines, so that if your Internet connection fails, your office still has telephone communication.

Many multi-site operations, such as franchises, retail and bar chains, local councils, real estate agencies, and church and religious organizations, use Quadros to unify all the branches together, even overseas locations. This centrally managed

telephone system helps the business cut telephone costs, making all their internal calls free.

Offices with 2-24 people:
- for example; local accountants, travel agents, franchise chains, private doctors, dentists, freelancers, teleworkers, schools and remote offices

Both FXO and ISDN BRI versions are available in a smart, compact desktop/wall mountable unit.

Available in a smart, compact desktop/wall mountable unit. Offers standard PBX or Key System features.

Offices with 19-106 people:
- for example; lawyers, health centers, hotels, auto dealers and universities

Both FXO and ISDN BRI versions are available in a rack-mountable unit. Features include automatic call distribution and integrated audio and video conferencing.

Both FXO and ISDN BRI versions are available as a rack-mountable unit. This PBX has the same features as the QuadroM8L with more analog phone connections supported.

Offices with 32-194 people:
- for example; accountancy firms, publishing companies and head offices

Includes an integrated E1/T1 port available in a rack-mountable unit. Features include Barge-in capabilities and call recording.

Offices with 200 - 1,000 people:
- for example; small to medium enterprises and head offices

Server rack-mountable unit equipped with
all the advanced features found on the other
QuadroM PBXs.

Gateways

These are designed to link traditional PBXs with the Internet, enabling your organization to take advantage of some of the business-enhancing features offered by VoIP without replacing your existing phone system. You can also use them to set up mini 'points of presence' so you can have local telephone numbers in any country in the world.

Your Quadro gateway provides many of the benefits and all of the security offered by our IP PBXs. You will find the gateway sound quality is comparable to traditional phone lines, and they offer greater flexibility as you can use traditional, mobile and IP phones with them.

As with Quadro IP PBXs, you can use these gateways to unify all your organization's branch offices into one, centrally managed telephone system, with no need to change your telephone numbers. These gateways give you a rapid return on investment thanks to the excellent savings on your organization's calls.

Up to 6 simultaneous calls:
- for example; a small office or international sales team

for FXO analog connections

for ISDN BRI connection

SAVE travel time and money

Conference server

The Epygi Conference Server enables your organization to set up conference bridges of up to 30 participants in one or more simultaneous calls. Each conference call is managed by its moderator using a simple web-based user interface.

Quadro CS

Advanced office telephony solutions

Across the world, small to medium-size businesses are benefitting from installing Epygi's Quadros. They use Quadros to improve their work efficiency and productivity, enhance their image and reduce their communications costs. Quadro IP PBXs, gateways and conference servers provide state-of-the-art converged telecom solutions. They are the ideal, risk-free way to move your organization to Voice over Internet Protocol (VoIP), as they are compatible with all major analog and IP phone and telephone systems.

Why would you install Quadros in your office?

Here is what other people have said:

- ○ "I wanted to have all the traditional PBX functions plus all those extra VoIP features."

- ○ "Because my dealer said it would be quick and easy to install – he was right."

- ○ "The chairman wanted to make our organization appear more professional."

- ○ "The director demanded VoIP, but only if the sound quality was the same as a traditional telephone system."

- ○ "I recommended Quadro to the board, because it is a flexible system that will grow with our organization."

- ○ "Quadro was for us, because we had to be sure our telephone-based alarm system would not be interrupted, even if the Internet connection failed."

- ○ "To save money on our call costs."

- ○ "I had seen one in use at a customer's office, so I knew it would be easy for us to use and manage."

- ○ "We knew that the 'call relay' function would make a big difference to our customers and employees."

- ○ "My IT manager recommended it due to its built-in firewall and back-up landlines, which have given us security and peace of mind."

- ○ "Using Quadros was the best way to unify all our different branches into one reliable phone system."

- ○ "I had to be certain that our telephone-based credit card authorization system would work with no problems over the new phone PBX."
